Canon

CANON MEXICANA, S. DE R.L. DE C.V.

TITLE: STANDARD WORK PROCEDURE						
NAME: BISG DEALERSS TRAINING						
REFERENCE: PET-O15/18	START EFFECTIVE			VERSION	PAGE 1 OF 8	
	DAY	MONTH	YEAR	6		
	29	05	18			

OBJECTIVE

Carry out the training in a complete and formal way to the internal staff and our business partners, for the proper functioning of all equipment that Canon Mexicana S. de R. L. de C.V. commercializes.

Maintain a minimum level of satisfaction of 95% that will be determined through the semiannual result of surveys made to each of the participants.

SCOPE

All the training guidelines will be aimed at all our authorized dealers, according to the authorized product lines, as well as to the technical staff that works at Canon Mexicana, S. de R.L. of C.V. within the BISG area.

MADE BY:	REVIEWED BY:	APPROVED BY:
AGUSTIN LINARES	CARLOS ZAMORA	MASASHI AOKI
TRAINING SUPERVISOR	MANAGER SR. OF SERVICE BISG	DIRECTOR ADM SR. BISG
DATE: 29/05/2018	DATE: 29/05/2018	DATE: ~~29~~ 30/05/2018

P.A.
Sergio Feijoo.

DEFINITIONS

Quarterly Programming: Training calendar with start dates of courses.

Participants: Each one of the technical aspirants who can take a training course.

Dealers: Business partner that is responsible for marketing Canon equipment through its chain.

Model: Refers to each of the equipment that Canon commercializes.

Line: A group of canon equipment that performs the same function.

Technical Reference: technical manuals and Information that serves as support for those technicians that took course.

Theoretical evaluation: Each one of the measurable parameters of the course that are based on the operation and function.

Qualified Instructors: Trainers previously certified to teach course.

Preventive Maintenance: Cleaning routines that must be performed to ensure the proper functioning of the equipment and that must be done in a scheduled manner.

Policies

1. The head of the Training area, informs through an email the official calendar of courses by model, line and date that are given quarterly throughout the year to all authorized dealers.

2. It is the responsibility of the training area to publish or publicize the description of each course, the content thereof and the indispensable prerequisites that each participant must cover to attend the course.

3. As a representative of Canon Mexicana, each instructor has the responsibility to carry out a theoretical and practical evaluation of each participant. The theoretical evaluation must be informed individually to each participant at the end of the course.

4. The Training Department must send the training procedure to all the dealers, where they mark the requirements to be covered, including the procedures to schedule training courses.

5. The Training Department will determine the minimum and maximum number of participants that each course must have and will make them known through the Quarterly Course Calendar.

6. The training area may decide to cancel or extend the delivery of courses, based on the number of participants, technical level or availability of equipment, facilities, spaces, etc.

7. Canon Mexicana, S. de R.L. of C.V., through its Training Area BISG offers the training of all its currently valid products in a formal and constant manner to all our Authorized Dealers through highly qualified and certified instructors for that purpose.

   The course schedule is based on the following:

   a. That it is intended to sell a new model or product.
   b. That there is a deficiency in the dealers.
   c. That there is specific demand from dealers.
   d. Make it a need for staff training from the Canon BISG Service department
   e. That fits the current ATSP certification program

8. Each course is taught by experienced and qualified instructors, being as a representative of Canon responsible for providing sufficient equipment for this purpose in the training given at our facilities as well as providing teaching materials such as equipment manuals, accessories, Reference Manual Technical, Catalog of parts, bulletins, etc.)

Responsibilities of Canon

1. Develop a periodic training program based on the calendar of courses offered by Canon for the technical staff and ensure that they participate in it.

2. Propose training routes offering fast and high-level training alternatives for new technical personnel and experienced technical personnel.

3. Register and confirm to the Dealers the participation of its technicians in the respective courses at least 5 working days at the beginning of the requested course.

4. Deliver the courses scheduled in the quarterly calendar, according to the objectives and topics to develop, previously established.

5. The training representative must coordinate the special foreign courses for several dealers throughout the year based on the needs of the dealers and Canon Mexicana.

6. Evaluate in a theoretical and practical way each participant, through the corresponding exams and report the final evaluation per course received to the Dealers on a monthly basis.

7. Prepare teaching materials and the equipment assigned to teach the technical course according to the previously authorized programming.

8. Send the technical information such as Service Manuals and Parts Catalog corresponding to the model seen in progress, only once when the dealers attends and credits the product's course.

9. Control and safeguard the personal data of the technicians and/or service personnel of the Dealers who attends the technical training courses.

10. Provide access to the sales area to the technical training database to see the list of courses attended by each authorized dealers

11. Submit a certificate to the participants which will be valid until the date on which the technician stops working with the authorized dealers.

12. Have a database for the consultation and administration of the information of the training area, where REG-57 and REG-62 records can be generated.

Responsibilities of Dealers

1. Develop a periodic training program based on the calendar of courses offered by Canon for technical personnel and ensure that they participate in it.

2. Send quarterly to the head of the Training area their current technical population in order to carry out training programs focused on meeting needs. The dealers must notify as soon as possible the name of the technician or technicians who have terminated by contract.

3. Schedule all their service personnel to take the necessary courses that allow you to install and give preventive maintenance service to the models of office equipment that they have authorized to market.

4. Keep all their staff trained in the entire portfolio line of Canon Effective products.

5. Request reservation of seats for a course with a minimum of 5 working days in advance of the start date of the desired course through the respective format.

6. Ensure that the technical information delivered in progress is used appropriately by the Director or Service Manager of each Dealers.

7. Receive the evaluation reports and participation certificates that apply, deliver or make known these to the technical staff that has participated in the courses.

8. Ensure that participants attending the course, are present on the day and time that was confirmed, through the respective document, for the start of the course. Failure to comply with this point will be considered a serious fault so they will be entitled to the cancellation of their participation.

9. Make the selection of participants to course, in the manner suggested in the Training Map published

10. In case of requesting courses to be taught in their own facilities, they will cover the expenses generated by the per diem (transport, food and lodging) of the instructor who attends to teach them.

11. Encourage the participation of their technical staff in the ATSP technical certification program.

Responsibilities of Participants

1. The course participant must bring the original of the Service Manual and Technical Reference Manual of the model to be attended.

2. Be present and in a timely manner, the day and time specified in the training confirmation previously sent to the service management of your company, as two or three delays will be sufficient cause for it to be canceled.

3. Show good behavior within the facilities of Canon Mexicana, S. de R.L. C.V., or otherwise, may be expelled from the course and will be informed of it to the General Director of the Dealer or Service Manager of your company.

4. Follow the instructions given by the instructor during the course, for the handling, disassembly, assembly, repair and adjustment of the equipment seen in progress.

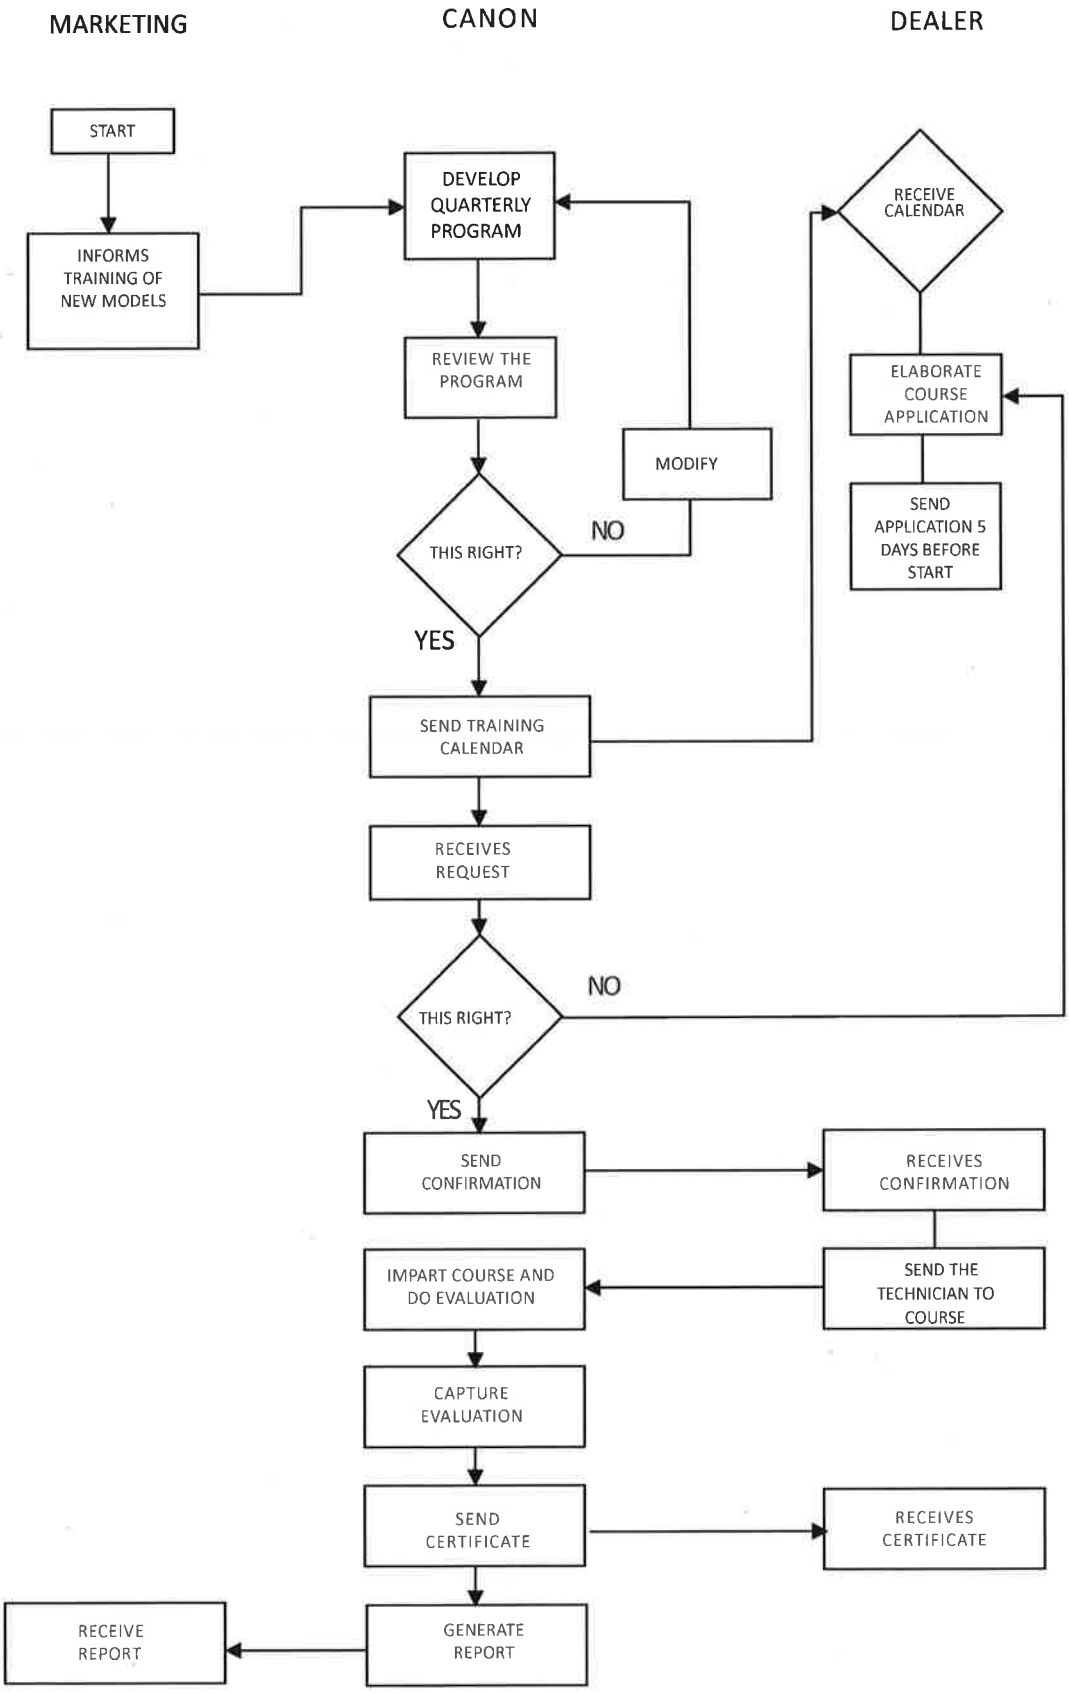

5. Answer the examinations that the instructor considers pertinent, so that it is evaluated in its theoretical-practical capacity, to issue a report of training on its use.

6. Failure to comply with any of the preceding paragraphs may be cause for suspension in the course. Needing to reschedule their training immediately.
