## Objectives

Stablished the specific and necessary parameters and criteria's for the correct control , level and rotation of the BSG inventory trough the destruction of spare parts ..

**SCOPE**

All spare parts of BSG , OCE and Canon lines located in the ware house (WP,1P, Techniques and clients) agreeing with the criteria's stablished be susceptible with the destruction proses.

**POLITICS:**

Criteria's and process for spare parts destruction of BSG

**PROCESS TO FOLLOW :**

1. The administration service of BSG trough the analysis of several data bases of system 85 and 21 will determinate wish spare parts are susceptible for the destruction according with
   **Criteria's:**
   - All spare parts with less movements of the last 3 years not identify as replaced of existence equipment's in camp.
   - All spare parts contained in ware house, car stocks and clients that for nature are damage and unworked.
   - All spare parts that are for discontinued equipment's from Mexico Canon and which population is cero ( no existence on system).
   - The maximums periods stablished for each destruction will be defined from the management service annual modes, with previous writing authorization from the direction.

2. Accounting area will define the destruction format for each respective destruction.

3. Ones the destruction mount is defined according the criteria's before mentioned, the service administration of BSG elaborated the formats.

4. The destruction formats have to be authorized by the management direction of BSG service.

5. Ones the formats are authorized the accounting area have to give the VoBo to proceed. In this case the accounting area give the information to the ware house for the end of the proses.
6. In the case of the returning parts from car stocks and clients the BSG service are responsible to return the parts to the ware house (indicated from the ware house

management) next these they have to present the acknowledgments of received parts from the accounting area to valid the process.
