Canon
CANON MEXICANA, S. DE R.L. DE C.V.

TITLE: **OFFICIAL MEXICAN STANDARDS (NOM)**					
	VALIDITY BEGIN			VERSION	
REF: HEALTHCARE-021/08	DAY	MONTH	YEAR		PAGE 1 OF 3
	31	05	2018	**1 .0**	

I. OBJECTIVE

Establish guidelines for processing or renewal of Official Mexican Standards (NOM) certificate through the Service Administration Department applicable to power supplies, battery chargers, monitors and computers for the Healthcare area commercialized devices.

II. SCOPE

This policy is applicable to the employees of Canon Mexicana

III. RESPONSIBILITIES

The Healthcare Service Department has the technical knowledge in order to adequately respond to service requests, technical information, manuals and any information required by the Service Management Department regarding procedures related to the Official Mexican Standard.

It is the responsibility of the Service Supervisor and the Healthcare Manager to conduct the necessary authorizations, as well as to have the appropriate articles and documentation available for evaluation in accordance with the equipment release or NOM renewal schedule.

IV. PROCEDURE

1) Establish a calendar for the renewal of valid certificates and the processing of new ones for product launches, which must include the certificate number, product, model, product code, origin, applicable standard and request dates.
2) In case of new product launch (new certificate request):
   A. The NOM process must be initiated at least one month in advance of the launch date.

B. Identify the articles for which the NOM procedure will apply.
C. Order the articles to Canon USA according to the procedure HEALTHCARE-013.
D. Acknowledge the Traffic Department regarding the entry of the articles for the first time in order to identify the applicable NOMs according to the customs classification. Provide all the documentation and necessary information to carry out this labor.
E. Follow up the NOM process with the BISG Service Management Area and provide all the required documentation and information.
F. In the event that an article does not approve the NOM process, the procedure will be requested again for which a purchase order for a new article will be made. Return to point 2.C. It should be taken into account that there are 3 attempts to complete the NOM process.
G. Once the item satisfactorily meets the respective NOM tests, it will be included into the product warehouse as available.
H. Proceed with the request for a loan according to policy HEALTHCARE-011 in order for the items to be transferred to the Healthcare asset.
I. Inform the Accounting Area about the acquisition of the asset in order that the item is accounted and a fixed asset label is attached.
J. These items can not be sold because will be used for the certificate renewal process based on the information attached to each article.
K. Enter the appropriate data to the renewal calendar according to point 1.

3) In case of NOM certificate renewal:
   A. The Service Supervisor and the Healthcare Manager will validate the need to renew the NOM certificate of a given item, depending on the respective device life cycle.
   B. Nine months after the certificate issue date, a request to the Service Administration Area should be made for the "article follow up tests" ("follow-up visit") in order to re validate the tests performed during the previous certification process. The Healthcare Service Department must ensure the availability of the articles for this process and generate the output process in the lotus notes database.
   C. In the event that the items are physically located in the Canon Mexicana warehouse, the Healthcare Service Department will be responsible for requesting the necessary transfer for delivery to the Service Management Department.
   D. Once the follow-up visit is completed, the items will be stored in the location deemed appropriate by the Service Supervisor.

E. Request the Service Administration Area to enter the certificate renewal process at least 15 days prior to the expiration date.
F. Once the certificate has been renewed, obtain a copy of it and update the corresponding data in the renewal calendar
