CANON MEXICANA, S. DE R.L. DE C.V.

TITLE: **TECHNICAL SUPPORT**					
	VALIDITY BEGIN			VERSION	
REF: HEALTHCARE-015/18	DAY	MONTH	YEAR		PAGE 1 OF 3
	31	05	2018	**1 .0**	

I. OBJECTIVE

Establish the guidelines to provide technical support by any means (telephone, remote, written or on site) to the Canon Healthcare devices.

II. SCOPE

This policy will be applicable to the employees of Canon Mexicana

III. RESPONSIBILITIES

The Healthcare service department has qualification and training in order to adequately respond to customer service requests. In case that any other representative of Canon Mexicana receives a service request regarding Healthcare devices, must refer it to the Healthcare service department in order to assure the quality and customer satisfaction in the offered technical support and will carry out the following points as process.

It is the responsibility of the Service Supervisor and the Healthcare Manager to establish the applicable costs of reviews, services, spare parts, updates and insured shipping prior to the formal quotation to the customer or dealer, as well as the commercial and payment terms according to the current BISG Service Management Department policies.

IV. PROCEDURE

1) Receive a formal request from the customer which must include name, telephone, email, location, device model and serial number. Identify if the device was supplied directly by Canon or by a dealer and if it is under warranty.
2) If the device was supplied by a trained and authorized dealer to offer technical service to Healthcare devices, at first instance a professional and quality attention to the customer must be provided looking for a

problem solution. However, the dealer will be responsible for monitoring and solving the problem complying with conditions stated in the distribution agreement.

3) Investigate the failures observed in the device in order to determine probable causes.
4) In the case that the problem is diagnosed to be due deficiencies user operation, proceed to provide training in a specific manner in order to correct the failure origin. In case the customer requires more extensive or onsite training, a quote will be presented according to policy HEALTHCARE-016.
5) In case of detecting a failure caused by hardware or software malfunction, the most appropriate way to perform an exhaustive review and diagnostic will be established either remotely, at the customer's site or at the Canon facilities, presenting the customer or dealer an inspection quotation. In case the device is under warranty coverage, proceed according to policy. HEALTHCARE-020
6) Once the customer or dealer accepts and complies with the conditions stated in the inspection quotation, proceed with the following points.
7) In case of failure due to software conflicts, the first option will be to perform a review via remote connection software to identify the cause.
8) In case of failure due to hardware conflicts, proceed to identify the cause as well as the corrective actions and spare parts.
9) If required, the support from Canon USA will be sought in order to offer the best solution for the customer.
10) Once an accurate diagnosis of the fault origin is obtained, the customer is contacted in order to present a written report which will detail the cause, solution, course of action, spare parts and software updates that apply. At the same time, a repair quote will be presented which include corrective service costs, spare parts, software updates and insured shipping costs (if applicable), as well as the applicable commercial and payment terms. The warranty for corrective service and parts is 30 calendar days from the service ending date.
11) In the event that the customer does not accept the repair quotation, the devices will be returned (if applicable) and the service will be terminated, reporting to the customer the reason for not proceeding. Likewise, the customer must cover the charges established in the inspection quotation.
12) In the event that the customer accepts the repair quotation, and prior to the execution of the service and spare parts request to the Service Administration Department, all commercial and payment terms established in the quotation must be fulfilled.

13) In case of requiring spare parts for the service, the appropriate purchase order will be sent to the BISG Service Management Department in order to procure the supply on time and shape. Likewise, the service purchase order will be sent to Order Desk.
14) In the event that the service is carried out at the Canon facilities, once the parts are available in the warehouse, the customer will be asked for a letter that includes the "CP" number authorizing the Distribution Department to deliver the spare parts to the Canon facilities where the service is performed.
15) Proceed with the corrective service execution performing the applicable performance tests and validations
16) A service order in the Healthcare Service Supervisor authorized format will be prepared, sending a copy to the customer.
17) If applicable send the devices to the customer and confirm the correct reception thereof.
18) Register all finished support or service in the Lotus Notes database "BISG HC Support", attaching the appropriate service order.
19) Follow up on good device performance within 30 days after the end of the service.
20) Send the technical service satisfaction survey using the format authorized by the Healthcare Service Supervisor.
