CANON MEXICANA, S. DE R.L. DE C.V.

TITULO: **FORKLIFT OPERATION POLICY**					
	STARTING DATE			VERSION	
REF:	DAY	MONTH	YEAR		PAGE 1 OF 3
DIST-004	08	03	21	**1 .0**	

OBJECTIVE: Establish the proper handling and risk prevention on the forklift devices operated at the Distribution Center.

SCOPE: The activity performed by forklift operators at the Distribution Center related to the operation, maintenance and risk prevention.

GLOSSARY:

Fixed Assets: real estate, materials, equipment, tools, and utensils not to be sold, that is, that will not become into profit for at least the first year.
Hour meter: device that records the number of hours that an engine or piece of equipment, usually electrical or mechanical, has run since the last time the device was initialized. These devices are used to control preventive maintenance interventions on equipment.
Forklifts: vehicle that can be used to transport, tow, push, stack, raise or lower various objects and items.
Forklift Operators: personnel authorized to operate forklifts; also known as operator.

GUIDELINES:

1. It is strictly prohibited for Canon personnel to use or operate forklifts. The forklifts will be operated only by personnel authorized by the Distribution Center Supervisor and Logistics Sr. Manager.

2. All the forklifts must be reported to the Accounting staff on duty for their correct registration as Fixed Assets.

Eduardo Lopez Internal Audit Advisor	Oliver Munoz Logistics Sr Manager	Morihiro Makita Finance Director
Date: 16/10/20	Date: 18/12/21	Date: 06/03/21

3. The safety equipment mandatory for the forklift operators to use must be:

a. Helmet
b. High visibility safety vest
c. Safety shoes
d. Any other indicated by the Supervisor of the Distribution Center and / or Logistics Sr. Manager.

4. Forklift operators must be certified by the authorized bodies for this purpose.

5. HR Management is responsible of providing different choices of vendors to certify the forklift operation.

6. Responsible and competent staff must be appointed for keeping and protection of the forklift keys. These personnel shall not be forklift operators.

7. Forklift keys must be under protection and with limited access to the staff authorized for the forklift operation.

8. During non-working hours, the forklift keys must be locked and with access control over them.

9. Whenever forklifts are not being operated, they should be parked in the delimited and secured location designated and marked for this purposes and without the keys properly secured in the designated area.

10. Prior to the start of the journey, forklift operator must do a checkup over the forklift which need to at least contain:

    a. Machine identification number.
    b. Date.
    c. Name and signature of the operator.
    d. Hour meter.
    e. Results of visual inspection.
    f. Results of revision of operation mechanisms.
    g. Percentage of battery left.

    For this purpose, Annex "Forklift Checklist" needs to be utilized.

11. Record needs to be kept documenting the usage of the forklift, this record must contain at least:

    a. Name and signature of the operator;
    b. Date with start and end time of the operation;
    c. Identification number of the machine used; and
    d. Personnel who receives the keys by the end of the journey.

12. Every forklift must have an opportune maintenance at least every 300 hours of duty.

13. Maintenance control must contain an identification number over the forklift, a control over the amount of hours worked (hour meter), last time of maintenance, and at least a monthly monitoring over the hour meter.

14. DC Supervisor is responsible to verify the maintenance calendar.

15. Logistics Sr. Manager is the only one authorized to negotiate with vendors that provide forklift maintenance services.
