OBJECTIVE

Describes the criteria for disabling an email account in Lotus Notes, in the "workflows" and the network account of a user who has been removed from the company.

SCOPE

This policy covers the procedure to disable access to Lotus Notes and the network when a user has been removed from the company and the procedures to update the different databases in Lotus Notes when a user's account has been disabled.

GENERAL GUIDELINES

1. The HR department must notify the IT Department in advance (when possible) if a user leaves the company.
   A. The HR department must enter a ticket using the DB in Lotus Notes to notify the Department of Systems the date of departure of the employee.
      I. If due to confidentiality issues, HR cannot notify the IT area, the ticket must be lifted once the employee's departure has been made.
   B. Within the request must be specified if the backup of the user's information is required.

2. The HR department must perform the following tasks:
   A. Disable the user's account within the database.
   B. HR department must request CUSA to disable the PeopleSoft account. This is imperative.

3. The Lotus Notes administrator must perform the following tasks.
   A. Must remove the employee to the base of disabled users.
   B. Must delete the user from the "Address Book" in Lotus Notes.
   C. Must remove the user from the Distribution Lists in Lotus Notes.
   D. Must disable the Lotus Notes ID.
   E. Must remove the employee from all Lotus Notes workflows.

4. If the user's email needs to be enabled after the employee leaves.
   A. The Area Manager must enter a ticket using the DB in Lotus Notes.
   B. Once the application has been approved by the Area Manager, the email account will be enabled to receive emails for only one month.

C. After this period, the email account will be deactivated and deleted.
D. If any additional time is required, it must be approved again by the Manager Sr. with a prior ticket.

5. If the Area Manager requests the employee's email history.
   A. The request must be requested through the ticket DB in Lotus Note.
   B. Once approved by the Manager Mr., the Infrastructure area will provide the backup.

6. The Lotus Notes administrator must remove all user workflows (workflows) in order to avoid approval problems in the different documents.

7. The Infrastructure area must block the network account in Active Directory.
