CANON MEXICANA, S. DE R.L. DE C.V.

TITLE: **WORKFLOWS IN LOTUS NOTES**					
REF: SIS-005	STARTING DATE			VERSION	PAGE 1 DE 3
	DAY	MONTH	YEAR		
	01	06	18	**2 .0**	

OBJECTIVE

It describes the guidelines to follow of the Lotus Notes system to work correctly after requesting a modification (improvement or update) of the user.

SCOPE

This document applies when an employee changes area or is promoted; it also covers maintenance to AddressBook, requests to change any "workflow"; Lotus Notes inventory and procedure for user access validation and periodic access review, as well as improvement updates.

GENERAL GUIDELINES

1. The HR department must let the IT department knows about any change of employee (promotion / change of area). This change must be formally communicated through the ticket DB in Lotus Notes.
   A. The HR department must update the general information of the newly hired employee promoted or changed in the employee base in Lotus Notes. (This database contains all the information related to the employee, such as: area name, division, cost center, distribution list, immediate manager, etc.).
   B. Once IT area receives the formal request (step 1) from the HR department of a promotion or change of area:
      I. The IT Department must remove all permissions and access to databases published in the employee's Lotus Notes to prevent the user from accessing information that is not required in their new position. The Lotus Notes email account will remain as newly created, this account will only have access to the general databases in Lotus Notes, that is, an account with limited access.
   C. The newly hired manager promoted or changed will define what type of access or permissions you will need in Lotus Notes databases..
      II. To keep track of employee access types, this request must be through the ticket tool in Lotus Notes.
   D. The IT Department will assign the new permits and accesses to Lotus Notes to the new employee promoted or changed according to the type of permissions defined in the ticket (mentioned above).
2. Requests for the creation of Databases in Lotus Notes.
   A. All requests for database creation must be through the ticket system in Lotus Notes.

IT	LEGAL
HUGO AVILA DEL MORAL GERENTE SR. SISTEMAS FECHA: 01/06/2018	CAROLINA MEJIA DIRECTORA SR. ADMINISTRATIVA FECHA: 01/06/2018

A. The Request must be evaluated and approved by the IT area.
B. If applicable, this request must be approved by the owner of the database, based on point 6.a of this policy.

3. The procedure of maintenance / changes of "workflows" in the databases in Lotus Notes (changes and new developments) are only made by the administrator of the DB, as are:
   A. All the new requirements; Updates and / or changes should be through the support tool in Lotus Notes.
      I. If it is a new "workflow", this type of request must be approved by the Manager or Director of the requesting area.
      II. If it is a change / modification, the request must be approved by the owner of the "workflow", based on point 6.a of this policy.
   B. Once the request has been approved, the Lotus Notes administrator develops / changes what is necessary; the administrator performs the necessary tests with the users
      I. The testing phase is necessary in any new or changes in the "workflows".
   C. Once the user accepts the changes in the testing phase, these changes are moved to the production environment.
   D. The Blind Carbon Copy (BCC) is not allowed within any code of the "workflows". The Manager Sr. of Systems will give the VoBo the new developments in the "workflows" ensuring that BCC is not within the code.
4. Maintenance to the "Address Book" in Lotus Notes.
   A. These changes are only made by the Lotus Notes administrator, and all requests must be made through the ticket DB in Lotus Notes, some are:
      I. In case the employee leaves the company, the administrator must disable the Lotus Notes access account. See more details in the User Cancellation policy in the Canon Mexicana network.
      II. If a change of name, email and any other changes related to email accounts are required.
5. Movement of the computer. If a user moves to another department, the computer belongs to the current area, the employee does not take the computer to the new department.
   A. The infrastructure area will migrate employee information; the Lotus Notes / Infrastructure areas will grant the necessary permissions to the systems / databases of Lotus Notes.
      I. Take into account points 1 and 3 of this policy, where the actions for the authorizations are mentioned, to give access to the databases or modifications in the "workflows".
   B. If an employee is promoted, the Infrastructure area and the Area Manager will evaluate if the employee needs a new computer.
      I. If necessary, IT department begins the purchase process with the Manager Sr. Involved.
6. Inventory, access control and periodic security review of databases in Lotus Notes:
   A. IT department must have a database matrix in Lotus Notes that will contain:
      I. The name of the database
      II. The owner of the database
      III. Name of the user, name of the database and the type of access it has.
   B. Audit area will be in charge of carrying out a periodic review of this matrix every 6 months in order to maintain the necessary permissions in each user / database.

C. All requests for access to any database must be registered through the ticket system in Lotus Notes.
D. These requests must be approved by the Manager or Director of the requesting area.
E. The IT Department must have updated the matrix with each change / download / promotion of the users.
